**DETAILED ACTION*****Drawings***

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the step of "coupling current from the inductor to the load circuit when the ramp signal level has reached the reference signal level" in claim 17, lines 14-15, must be shown. No new matter should be entered.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

*Claim Objections*

2. Claims 1, 6, 12, and 17-18 are objected to because of the following informalities:

In claim 1, line 12, "(VRef)to" should be changed to --(VRef) to--.

In claim 1, line 16, "the voltage" should be changed to --a voltage--.

In claim 6, line 4, "the output voltage" should be changed to --an output voltage--.

In claim 12, line 11, "(VRef)to" should be changed to --(VRef) to--.

In claim 12, lines 14-15, "the voltage" should be changed to --a voltage--.

In claim 17, line 10, "the on-time" should be changed to --the on-time interval--

In claim 17, line 14, "the ramp signal level" should be changed to --a ramp signal level --.

In claim 18, lines 3-5, " the operating voltage" and "the operating current" should be changed to --an operating voltage-- and --an operating current-- respectively.

*Claim Rejections - 35 USC § 112*

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2821

In claim 20, line 3, it is unclear what "the on-time interval spans the time period from the of the reset of the ramp signal until the time where the ramp signal reaches the reference signal level" means.

*Allowable Subject Matter*

5. Claims 1-20 would be allowable if rewritten or amended to overcome the objections and/or rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

6. The following is a statement of reasons for the indication of allowable subject matter:

The cited art of record fails to teach an apparatus and a method for controlling an output current that is delivered to a load circuit from an inductor comprising a ramp generating circuit, a feed-forward circuit, a comparator circuit and a latch circuit with their functions in the manner as recited in the claims 1, 12 and 17.
